INTRODUCTION

- **Smart lighting company is an Egyptian company specialized at energy saving field by using led lighting systems, as we have factory that making over 50% of our products in Egypt with high quality according to universality specifications**
- **Smart lighting company is dealing with the elite of international companies specialized at the lighting systems, like (Cree – bridge lux – Phillips – Epistar) in manufacturing chips field with both type (COB –SMD) and (Phillips Meanwell) on manufacturing drivers**

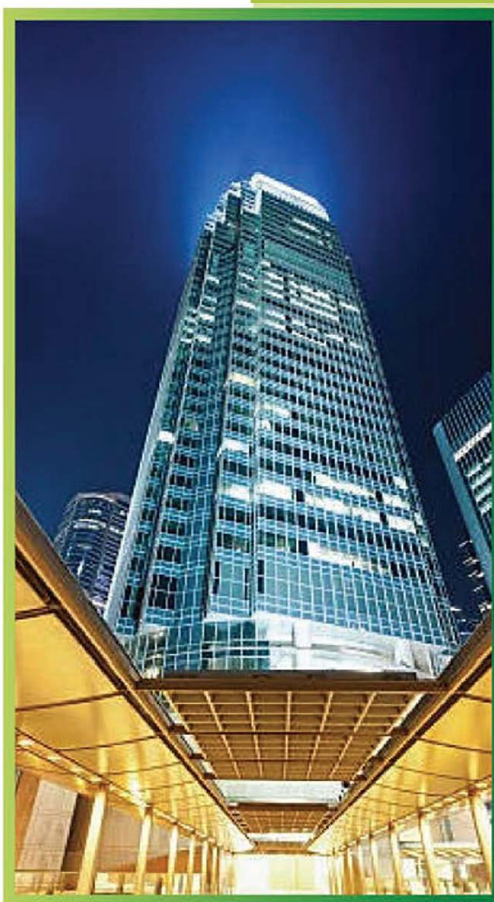

VISION

will redirect the rudder to strong electrical brands like us

ADDED VALUE

- Commitment
- Innovation
- Customer satisfaction
- Social responsibility
- Best quality

MISSION

To bring both of saving and safety to your place on a back of a car owned by a good reputation company

- Quality and saving are our priority.
- get the latest updates on our components.
- Our team is well trained to work on that field and solve its problems.
- We have a great after sale
- service and good contact with our customers

WHY USING LED LIGHTS ?

Saving

Using led lighting saves about 85% of your consumption As it all has higher luminous with lower wattage.

Safety

all of our products has sensors to save the lights against high temperature and A wid voltage range to save it from over voltage and voltage drop

Long life Time ..

All of our products has a life time between 30000 to 50000 hrs Which gives you over 10 years till you need to change it

Stability

We are using the best brands around the world which gives us the ability to guarantee the stability of lighting lux for 5 years .. so no dimming after using it .
